TECHNOLOGIES

HTML5 & CSS3
Javascript ES6
Vue JS
Git

SOFTWARE

Visual Studio Code
Figma

BASIC INFORMATION

 I am a novice Front-End Web Developer that loves to make websites from existing designs.
 I am always seeking to expand my skills and inform myself about new trends. My goal is to expand the knowledge I have to be a better front-end in accessibility area.

PROJECTS

Bidding Auction Website

github.com/LicentaAlexeiDenis
 This project was the final paper for graduation. The purpose was to make a auction website with functionalities that reflect real world auction websites.

Subs.ro

subs-ro-vercel.app
 This website is a mobile version for an existing subtitles website. The purpose was just to build a template for the users to navigate more easily.. The design was made in Figma and the app in Vue JS. I used an javascript object where I stored some mockup data to be shown in the page. The routing was made with Vue Router.

Education

Accounting and Computer Science

Bucharest University of Economic Studis - 2021
